1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 8-9 and 12-14 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Figure 8 of the instant invention.

Figure 8 of the instant invention is admitted prior art. Note that elements “98” or the bottom of element “90” constitutes the “second element” as broadly claimed by applicant.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Figure 8 of the instant invention in view of Lin (2003/0051583).

Figure 8 of the instant invention discloses all of the claimed subject matter except for the pawls having a boss fit in the spring. Lin discloses the pawls having a boss fit in the spring. It would have been obvious to one having ordinary skill in the art to form the pawls of Figure 8 of the instant invention to maintain the spring in engagement with the pawl as taught by Lin.

5. Claims 15-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Figure 8 of the instant invention in view of Roberts (4420995).

Figure 8 of the instant invention discloses all of the claimed subject matter except for having an insert with a switched detent. Roberts discloses an insert with a switched detent, a control device including an aperture, a space, and a rod, a hole in the rod, and a spring between the rod and the gear. It would have been obvious to one having ordinary skill in the art to form the device of Figure 8 of the instant invention with an insert with a switched detent, a control device including an aperture, a space, and a rod, a hole in the rod, and a spring between the rod and the gear to allow for a socket to engaged and locked thereto as taught by Roberts.

6. Claims 5-7 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
